SUMMARY

Full-Stack Developer (B.Tech CSE, 2026) with hands-on experience building transactional backend systems using **NestJS** and **PostgreSQL**. Experienced in implementing concurrency-safe booking workflows, JWT authentication, and **LLM-powered RAG** pipelines during a backend internship at **Wisflux Tech Labs**. Proficient in **React.js/Next.js**, with 4+ full-stack applications shipped end-to-end.

EXPERIENCE

SDE Intern

Jun 2026 – Jul 2026

Wisflux Tech Labs Pvt. Ltd.

Jaipur, Rajasthan

- Developed backend services using **NestJS**, **TypeORM**, and **PostgreSQL**, containerized with Docker Compose and secured with JWT authentication; implemented transactional workflows with locking to maintain consistency under concurrent requests
- Built a **Retrieval-Augmented Generation (RAG)** document Q&A system: PDF ingestion pipeline, vector embeddings with **pgvector** (MiniLM), and LLM orchestration through **OpenRouter** and Llama models
- Designed and implemented a modular, multi-service backend in an **Nx monorepo** with entity relationships, background job processing, and a booking/availability system

Frontend Developer Intern

May 2025 – Jul 2025

Celebal Technologies

Jaipur, Rajasthan

- Built a **Shipment Delivery Application** using **React.js** and **Tailwind CSS** with real-time tracking and REST API integration; collaborated in an Agile workflow using Git

PROJECTS

Hotel Booking Management System

Jun 2026

Stack: NestJS, PostgreSQL, TypeORM, Docker

- Designed a modular backend (Hotels, Room Types, Guests, Bookings, Availability modules) with JWT auth, DTO validation, and database migrations; documented via Swagger and containerized with Docker
- Built a transactional booking flow with **pessimistic locking** to prevent overbooking, availability search, booking lifecycle management, and booking hold expiration via scheduled jobs

AI Code Analyzer — Smart Coding Assistant

[Live](#) · [GitHub](#)

Stack: Next.js, TypeScript, Groq API, Monaco Editor

Apr 2025 – Jan 2026

- Built an AI-powered code analysis and visualization tool using the **Groq API** to auto-detect time/space complexity and generate refactoring suggestions; won **first prize** at a college-level hackathon

SKILLS

Languages: JavaScript (ES6+), TypeScript, C/C++, Python, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, TypeORM, Prisma, REST APIs, Swagger, JWT, Clerk Auth

Databases & BaaS: PostgreSQL, pgvector, MongoDB, MySQL, SQLite, Supabase, Firebase

Frontend: React.js, Next.js (SSR/SSG/ISR), Tailwind CSS, Zustand, Framer Motion

AI/Agentic: LLM Integration, RAG, Vector Embeddings, OpenRouter, Gemini API, Groq API

DevOps & Tools: Docker, Git, GitHub, Vercel, Postman, Claude Code, Cursor, Antigravity

EDUCATION

Amity University, Rajasthan

Aug 2022 – Jun 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.48

Class XII: 95.87% **Class X:** 83.67%

ACHIEVEMENTS

- GeeksforGeeks:** 250+ DSA problems solved in C++ (STL, arrays, recursion, trees, graphs)
- GitHub:** 4,500+ contributions in the last year · **GSSoC 2025** Contributor · IBM SkillsBuild AI · McKinsey Forward Program
